B2B Economic Outlook - UK

“Latest economic data indicates a rebound in the UK economy, bolstered by the easing of COVID-19 restrictions and the rapid vaccine roll-out. Businesses are also becoming more confident with a number of surveys suggesting improved expectations for economic conditions and investment intentions.

Data Centres - UK

“Data centres are at the very heart of the evolving IT landscape. COVID-19 has dramatically impacted traditional working practices and organisations of all sizes have been turning to modern IT solutions to keep their operations running, their teams connected and their costs under control. Additional services and enhanced hybrid cloud ...

B2B E-Commerce - UK

“COVID-19 has had a major impact on the e-commerce sector, providing growth for large elements of the B2C market (though difficulties in some areas) and more challenging conditions in the much larger B2B market. While there are questions over whether the pandemic has permanently changed consumer behaviour to boost the ...
