

January 2022**B2B Economic Outlook - UK**

“2021 has demonstrated a rapid recovery from the record fall in GDP in 2020 – in sharp contrast to the elongated flat recovery following the last recession. However, the huge uncertainties surrounding the outbreak of Omicron now dominate expectations for the economy. While the government clearly remains resistant to another ...

December 2021**Utility Capital Expenditure - UK**

“Infrastructure investment will continue to be a key focus across the utility sectors, driven by the need to replace old assets, boost resilience, deliver an environmentally sustainable network and supporting the transition to Net Zero. In response to COVID-19, the government and regulators have also encouraged companies to accelerate investment ...

October 2021**Renewable Energy - UK**

“While the UK has made good progress on decarbonising the UK electricity supply sector, significant investment in the whole system infrastructure will be required over the coming decade in order to progress towards net zero while ensuring security of supply.

This will entail increasing the role of renewables (predominately wind ...
