

January 2017**Utility Capital Expenditure - UK**

“The approach to infrastructure investment is in transition across the utility industry. Whereas spending was previously mainly output-driven, future investment decisions will be increasingly centred on innovation, asset optimisation and long-term outcomes. Operators will also be challenged by rising pressure from industry regulators to reduce costs for consumers, which highlights ...

November 2016**Electricity Industry - UK**

“A key focus for DNOs is the development and roll-out of innovative smart grid technologies to support the growing clean energy capacity coming onto the grid. New challenges for operators of the UK's regional electricity networks have already started to arise from shifts in the way electricity is produced to ...

October 2016**Renewable Energy - UK**

“The recent rapid expansion of the renewables sector is set to slow in percentage terms following a series of policy changes, including subsidy cuts, and the transition from the Renewable Obligation (RO) support scheme to the less generous Contracts for Difference (CfD) mechanism. More established technologies, such as solar PV ...
